

# Tele-Verification Process

## Email Marketing

Tele-verification allows your business to reach prospects and customers easily and effectively by verifying their phone numbers. Each phone number is run through algorithms to determine legitimacy and validity. Tele-verification increases validity of your contact database and improves communication with customers. At the end of the process, you also get other information about your lead.

Our Tele-verification process is an automated system that verifies users in real-time using their phone numbers. It is one of the simplest and most widely used technologies. Through this process our tele-verification executives contact your leads, generate quality data and update records.

## With our Tele-Verification process you can:

There are various reason that support a need for Email marketing

- Update records present in your database
- Validate the phone numbers instantly
- Find other important information about your prospects such as their location, preferences, industry background, interests, etc.
- Reduce costs involved in data management
- Save time by running phone numbers through automated system
- Concentrate more on your other marketing strategies and activities
